

5-fold status light

Status light to monitor current status of the cleaning system from distance.

Part number: 0905AQ-10ST5

Application

The status light indicates the status of the cleaning system (e.g., in large production halls) even from a distance, which improves the efficiency of the system or the production process, as it makes it easier to avoid unintended downtime between work cycles.

The following functions/process steps are shown by the status light:

- System standby
- Cleaning
- Rinsing
- Drying
- Warning
- Error
