

FUNCTION PACKAGE

Traceability Basic

Traceability Basic collects, documents, saves and archives process relevant data for download to password protected SD card (slot) in the PLC of the cleaning system.

Part numbers:

- 0900PSE-17TBS (Stencil cleaning) - *Scanner on the front panel
- 0900PSE-17TBP (PCBA cleaning)
- 0900AQ9-17TBS (AQUBE® MV9, AQUBE® XV9)

Application

Traceable data transfer of process-relevant data for download to SD card via slot in the PLC of the cleaning system.

Data transfer of the following information:

- Quantity and marking of cleaned PCBs / products
- Scan-Data: max. 50 Symbols ASCII Code European 32-127
- Date / time of process start
- Temperature of the cleaning detergent (if data / hardware is available)
- Process relevant parameters
- Quality of the clear rinse water in μS (if data / hardware is available)
- Drying temperature (if data / hardware is available)
- Error messages during a running process (max. 3)
- Data / time of the process end
- Information regarding the detergent used

Compatibility

	AQUBE® LH5
	AQUBE® LH7
	AQUBE® XH5
	AQUBE® XH7
	AQUBE® XH9
	AQUBE® MH5
	AQUBE® MH7
	AQUBE® MH9
	AQUBE® MV3 ONE
	AQUBE® MV8 sTWIN
	AQUBE® MV9 QUAD
	PSE LH5
	PSE LH7
	PSE MH5
	PSE MH7
	PSE MV8 TWIN
	PSE 300 2VL*
	PSE 300 2VL-XL*
	PSE 300 VL*
	PSE 300 2HD
	PSE 300 HD
	AF 20
	AF30
	AF75

Function package - Components

- Wireless handheld scanner
- Software module
- SD card

Standard in the system

Option ex factory

Retrofittable

Incompatible

Data tracking

kolb offers two traceability options for its cleaning systems. A Basic version, compatible with all systems with touch panel (PSE and AQUBE®-Systems) and a Comfort version, available for all AQUBE® systems.

Part numbers:

Traceability Basic: 0905PSE-17TBx

Traceability Comfort: 0905AQx-17TDT

Characteristics

Traceability Basic	Traceability Comfort
Storage of process-relevant data in a file on SD card in the PLC touch panel of the cleaning system. File Type: .csv (other formats can be requested)	Transfer and backup of process-relevant data in a SQL database (Microsoft SQL Server 2017, Express, free download version) with DataLogger (on a system-integrated PC)
Collection of data for further processing in his MES by customer	Visualization of the data in an edited table on the traceability monitor
Handheld scanner for data matrix and barcode	Handheld scanner for data matrix and barcode
SD card	Integrated industrial PC with Intel processor
---	In the right side door of the system integrated retractable touch monitor
Data transfer of the following information: <ul style="list-style-type: none"> Quantity and marking of cleaned assemblies / products / cleaning goods Date / time of the process start Temperature of the detergent (requirement: corresponding system configuration) All process-relevant times Quality of the rinse water in µS (prerequisite: corresponding system configuration) Drying temperature (requirement: corresponding system configuration) Error messages during the process Date / time of process end Information about the cleaning medium 	Data transfer of the following information: <ul style="list-style-type: none"> Quantity and marking of cleaned assemblies / products / cleaning goods Date / time of the process start Temperature of the detergent (requirement: corresponding system configuration) All process-relevant times Quality of the rinse water in µS (prerequisite: corresponding system configuration) Drying temperature (requirement: corresponding system configuration) Error messages during the process Date / time of process end Information about the cleaning medium
Scan data: max. 50 characters ASCII code, European 32-127	Scan data: max. 50 characters ASCII code, European 32-127
Download to password protected SD card	Interface software from the system PLC to SQL database
