

XL-Power unit

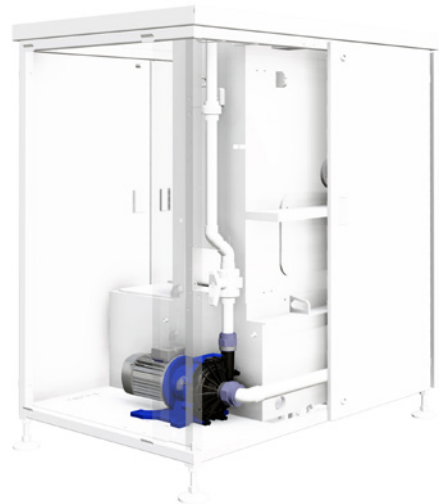

High-power pump unit for increased liquid volume and spray pressure

Part numbers:

0905AQ5x-9XL (AQUBE® / PSE systems)

0905PSE3-9XL (PS300 VL-RS)

0905PSE3x-9XL (PS300 2HY, 2VL)

Application

When cleaning PCB assemblies, especially with closely packed and / or a large number of fragmented layers and structures or screens and stencils with densely crowded small apertures, it may be necessary to increase the spray and volume pressure with an high-power pump unit.

This shortens the cleaning time and increases the cleaning efficiency of complicated built, fragmented products.

In all **kolb** XL (x7) cleaning systems the XL pump unit is a standard.
