

## ContraCor® A2

Inhibitor additive for **kolb** cleaning detergents for the protection of sensitive aluminum surfaces

Part No. 090685 // Content: 1000 ml

Product name until 11/17: AluInhibitor SH

## CLEANING TECHNOLOGY

Made in Germany

### Application overview

ContraCor® A2 will be added to the cleaning bath in a concentration ratio of 0.25 to 5%.

Technical data	
Color	tansparent
Odor	neutral
pH-value at 20 °C	11,4
Initial boiling point and range	not determined
Flash point	not determined
Density at 20 °C	not determined
Water solubility	easily soluble
Viscosity (kin.) at 40 °C	not applicable
Application	highly diluted (0,25 - 0,5 %)
Application temperature	20 - 45 °C
Storing frost-free	in original container
EWC key number	060314
CLP / GHS	GHS 05
ContraCor® A2 prevents tarnishing of aluminium surfaces during the cleaning process. not suitable for MultiEx® GC and MultiEx® SC detergents or for direct addition to cleaning concentrates.	

Applications	
ContraFlux® RM detergents	++
MultiEx® RM detergents	++
MultiEx® SC	—
MultiEx® GC	—
Detergent concentrates	—
Spray-in-air systems	++
Spray-in-immersion systems	++
Air-in-immersion systems	++
Ultrasonic systems	++
Manual application	—
<p><b>++ = ideal for application, + = recommended, o = optionally applicable, — = not recommended</b></p> <p><b>Note:</b> The spreadsheet only shows a general overview of the product specifications.</p> <p>Cleaning tests are reasonable to determine the optimum cleaner configuration. Such tests may be carried out directly at the <b>kolb</b> demonstration center in Willich / Germany or Shanghai / China or can be initiated by contacting your local <b>kolb</b> partner.</p>
