

## Campus S (Initial installation or Retraining)

### **Theoretical part** (E-Learning online)

#### **T/1 Special knowledge - Initial installation**

- Alignment
- Connecting
- Filling

#### **T/2 Special knowledge - Cleaning system**

- Flow charts
- Process fundamentals
- Basic functions

#### **T/3 Special knowledge - Cleaning systems plus**

- Expanded knowledge of efficient operation and productive processes
- Analytics
- Process monitoring

#### **T/4 Special knowledge - Annual maintenance**

- Maintenance package
- Replacement components

#### **E/C Excursus on cleaning chemistry**

- Detergent properties
- Detergent control
- Analysis methods
- Determination of the service life
- Water quality

#### **After completing all parts of the seminar**

Receipt of certificate of attendance as well as a handout of the training content in digital form

**Practice part** (at your **kolb** cleaning system)

You will receive the detailed, machine-related service description for the initial installation respectively the retraining from the **kolb** service department.

Commissioning training generally consists of the following instructions and services:

---

**Pre-operation**

- Unpacking and setting up the system (only for new installations)
- Aligning the system
- Connecting prefabricated connections to the system
- Filling with approved cleaning media

---

**Operation**

- Test of basic functions with common parameters
  - System basic knowledge training - one shift max. 3 persons
  - Basic maintenance training - one shift max. 3 persons
  - Test cleaning - a real process with existing cleaning goods
  - One-off adjustment of the process parameters after test cleaning
-
